

FATAL VISION® Concussion Simulation Goggles

FATAL VISION® Concussion Simulation Goggles

With the Fatal Vision® Concussion Simulation Goggles, participants experience the effects of a traumatic brain injury (TBI) caused by a bump, blow or jolt to the head or body. The program encourages participants to report a possible concussion, take measures to prevent a concussion and follow a doctor's prescribed recovery protocol should they sustain a concussion.

How they work

Each kit includes a series of activities designed with input from trauma doctors, to test hand-eye coordination, visual acuity, balance and cognitive ability. Participants perform the activities in their normal state first, then put on the Fatal Vision® Concussion Simulation Goggles. While wearing the goggles, participants experience the simulated TBI symptoms of dizziness, visual disconnect, disorientation, confusion and lack of confidence.

Fatal Vision® Concussion – Program Kit

Perfect for classroom demonstrations.

Includes: Two Fatal Vision® Concussion Simulation Goggles with cloth protective bag, user guide, classroom PowerPoint presentations for elementary or high school/college ages, one roll yellow and black "walk-the-line" tape, one triangle activity game, one foam ball, one Concussed activity game and accessories, 450 concussion action steps pocket guides, germicidal disposable wipes.

ACTIVITIES

Fatal Vision® Concussion – Event Kit

Works well for larger training groups.

Includes everything in Program Kit plus Sport Activities: One additional Fatal Vision® Concussion Simulation Goggles, carrying case, four colored stress balls, 10' x 4' DIES Mat with carrying strap, timer, five activity cups.

\$1,290.00 CG EVENT

10
ACTIVITIES

A concussion is more than just a bump on the head – it is a potentially debilitating injury that could have long-lasting effects.

The "Face Trace" Study Activity models the problem of sustained attention.

"I use the concussion goggles to educate parents, coaches and student athletes. Its far more effective than lecturing with a PowerPoint, a Hands-on activity that makes it a great teaching tool."

- Trainer
Local High School

The "Five Tap Target" Sports Activity models difficulty with hand-eye coordination.

The "Grabber Swap" Study Activity models the loss of fine motor skills.

Fatal Vision® Concussion – Campaign Kit

Ideal for organizations that need concussion training in both large group and office settings. Includes everything in Event Kit plus Study Activities: Two additional Fatal Vision® Concussion Simulation Goggles, two color card stacks, grabber, 12 multi-colored golf balls, two erasable whiteboard cats, two erasable whiteboard dogs, two whiteboard erasers, box of black dry erase markers, 5' x 3' DIES Mat for small spaces with carrying strap.
