# FATAL VISION® OPIOID GOGGLES

NEW

## MODELED IMPAIRMENTS

Divided attention failure, nodding out, contrast sensitivity impairment, heaviness and lethargy

### EXPERIENCE

**Divided attention failure, nodding out, contrast sensitivity impairment, heaviness and lethargy are impairments associated with opioid use and abuse.** After years of working with drug recognition experts in opioid abuse and addiction, Innocorp is introducing the Fatal Vision® Opioid Goggles and the associated opioid awareness activities.

By experiencing the modeled impairments of opioid use, participants are more aware and knowledgeable of the severe consequences associated with opioid abuse.

### HOW IT WORKS

Configure and control the Fatal Vision® Opioid Goggles through Bluetooth using the opioid mobile app on your smartphone.

**You will choose one of three impairments modes:**

**Mode A - Divided Attention Failure:** models the impairment that occurs when an individual experiences difficulty focusing on a task or task initiation. During this mode, quadrants of the goggle will sequentially blackout to impair a person's ability to sustain attention on an activity.

**Mode B - Nodding Out:** simulates a person's inability to respond to a cue as their sense of consciousness begins to shut down. During this mode, portions of the lenses blackout mimicking the gradual shutting of the eyes resulting in an unresponsive state.

**Mode C - Progressive Sequence:** rotates through both Mode A and Mode B to demonstrate the progression from a lower dose to a higher dose of opioid.

NEW

**addresses an issue everyone in the prevention field has been trying to provide information about. Our Youth Council gives them their seal of approval!"** - Mary Ball, Project Coordinator - Advocates for Substance Abuse Prevention Coalition

# FATAL VISION® MARIJUANA SIMULATION EXPERIENCE

PATENT NO.: US 10,366,630 B2

Frame styles may vary

## MODELED IMPAIRMENTS

Loss of short-term memory, executive function, altered visual perception, and slight loss of motor coordination

## EXPERIENCE

**Marijuana affects the brain differently than alcohol. The Fatal Vision® Marijuana Goggle reflects that difference.** The Fatal Vision Alcohol goggle distorts vision so the participant stumbles and loses coordination. The marijuana goggle impairs the participant's visual perception and reaction time. This lack of perception means the participant does not have all the necessary visual information to successfully complete specially designed activities modeling the impaired perception caused by marijuana.

## HOW IT WORKS

The Fatal Vision® Marijuana Goggle impairs a person's ability to perceive color (NOTE: someone under the influence of marijuana DOES NOT lose their ability to distinguish between colors). We use this feature of the goggle to model some of marijuana's impairing effects. The result is a loss of a participant's capacity to make quick and accurate decisions. For an impaired driver, that loss could lead to a crash. Each kit comes with instructional materials and videos that will help you use the marijuana goggles with custom designed activities. The activities give participants an understanding of the potentially severe consequences that can result from marijuana use.

## BENEFITS

- ✓ A safe and easy way to demonstrate impairment from marijuana
- ✓ Each activity can be easily tailored for use with participants of all ages including middle schoolers to adults
- ✓ Instructional materials prepare instructors to deliver a confident and factual demonstration
- ✓ Activities are structured to address how distorted perception and response parallel impaired behaviors that may occur while under the influence of marijuana

*Goggles are only effective with the activities in the kits. Therefore, they are not sold separately.*

## STARTER KIT [ 3 ACTIVITIES ]

# FATAL VISION® DROWSY AND DISTRACTED GOGGLES

## MODELED IMPAIRMENTS

Slower reaction times, lapses in judgment, delay in processing, and divided attention failure

### EXPERIENCE

Have you ever glanced down at your phone while driving, looked back up only to realize a car was stopped in front of you? Or, have you ever gotten behind the wheel of a car after a poor night's sleep and found yourself nodding off? Drowsy and distracted driving contributes to thousands of fatalities and serious injuries every year. Driving drowsy or distracted is driving impaired. The Fatal Vision® Drowsy and Distracted Goggles allow participants to experience simulated impairment from drowsiness or distraction and the potential devastating consequences.

### HOW IT WORKS

The Fatal Vision® Drowsy and Distracted Goggles are configured and controlled through Bluetooth using a mobile app on your phone.

You will choose one of three impairments modes:

**Mode A - Distracted Dial** simulates what could happen if someone takes their eyes off the road “just long enough” to dial a phone. Every three seconds, the goggles black out.

**Mode B - Distracted Text** simulates the distraction that occurs when someone reads or responds to a text. The goggles black out for 4.6 seconds to simulate the research-based average amount of time a person's eyes and attention are on a device, rather than on the road.

**Mode C - Drowsy** simulates momentary micro-sleeps that build in waves until the eyes and brain shut down. The goggles black out beginning with a short half-second closure, and continue to black out for longer periods of time, progressing to a 10-second blackout.

[ 5 ACTIVITIES ]

# FATAL VISION® CONCUSSION GOGGLES

Frame styles may vary

## MODELED IMPAIRMENTS

Slower reaction times, lapses in judgment, delay in processing, and divided attention failure

## EXPERIENCE

With the Fatal Vision® Concussion Simulation Goggles, participants experience the effects of a traumatic brain injury (TBI) caused by a bump, blow or jolt to the head or body. The program encourages participants to report a possible concussion, take measures to prevent a concussion and follow a doctor's prescribed recovery protocol should they sustain a concussion.

## HOW IT WORKS

Each kit includes a series of activities designed with input from trauma doctors, to test hand-eye coordination, visual acuity, balance and cognitive ability. Participants perform the activities in their normal state first, then put on the Fatal Vision® Concussion Simulation Goggles. While wearing the goggles, participants experience the simulated TBI symptoms of dizziness, visual disconnect, disorientation, and confusion.

"I could not do this presentation without the equipment (Fatal Vision® Concussion Goggles) I get from Innocorp. There's no other way to simulate these situations." - Kassie Cambell, RN, BSN - University of Missouri Health Care's University Hospital

# FATAL VISION® ALCOHOL GOGGLES

Frame styles may vary

## MODELED IMPAIRMENTS

Impaired balance, vision, reaction time, and judgment

## EXPERIENCE

It can be difficult to gauge how impaired you are when under the influence of alcohol. Enter the Fatal Vision® Alcohol Impairment Simulation Goggles, an eyeopening tool through which sober people can experience potential consequences of doing basic tasks after drinking.

Walking a line, standing on one leg, reaching out to grab a set of keys and tossing a ball become much more difficult under the influence of alcohol. The Fatal Vision Goggles give participants a safe way to learn the important lesson that alcohol greatly impairs a person's balance, vision, reaction time and judgment.

## HOW IT WORKS

The Fatal Vision® Alcohol Goggles deliver memorable lessons on topics like impaired driving, underage drinking, and other substance abuse issues. Participants perform simple activities or sobriety tests without and then with the goggles. Performing the activities twice lets participants experience their performance while unimpaired and then impaired. The goggles cause a person to display behaviors that are typical of individuals impaired by alcohol at various bac level.

**Fatal Vision is available in five levels that simulate the impairments associated with a particular blood alcohol concentration (BAC) - from less than .06 to .25+ BAC.** Fatal Vision is available with either a clear lens to simulate daylight conditions or a shaded lens to simulate night conditions.

# DANGER IN EVERY STEP® ALCOHOL IMPAIRMENT ACTIVITY MATS

## ALCOHOL PREVENTION TOOLS

These mats depict several common obstacles that can become hazards for a person under the influence of alcohol

### EXPERIENCE

Can you imagine the dangers associated with being drunk on a balcony? How about trying to navigate a winding sidewalk? Or descending a flight of stairs? The Danger in Every Step (DIES®) Alcohol Impairment Activity Mats provide an additional dose of reality to your Fatal Vision® Goggles activities.

### BENEFITS

- ✓ More engaging than using a “taped-line” on the ground for your activity
- ✓ DIES Mats help the instructor “set the scene” for each demonstration
- ✓ Promotes conversation and feedback from the participants
- ✓ Instructional materials guide the instructor through the activity and provide best practices, talking points, and optional activity ideas

RUBBER-BACKED MATS LAY FLAT TO PROVIDE A QUICK “ROLL-N-GO” ACTIVITY

MATS OPTIONS		DANGER IN EVERY STEP® (DIES®)	
PRODUCT		PRICE	
	<p><b>DIES® Balcony Danger Mat</b> - Designed to raise awareness about the dangers of alcohol impairment in a party scene. This mat provides the simulated challenge of walking through a room while performing simple tasks such as picking up a TV remote or piece of pizza, talking to another party goer, and avoiding tripping hazards that could result in falling from the balcony to the street below. This activity is ideal for those addressing potential dangers associated with house parties and other instances where alcohol may be present.</p> <p>Includes: A 4' x 14' durable rubber-backed DIES Balcony Danger Mat with carrying strap and user guide. (<i>Fatal Vision® Goggles not included</i>)</p>	\$575.00	
	<p><b>DIES® Winding Sidewalk Mat</b> - The DIES Winding Sidewalk Mat simulates the dangers associated with alcohol impairment while strolling along a winding sidewalk. This activity demonstrates to your audience the potential dangers of walking home impaired, which include falling off a sidewalk into traffic.</p> <p>Includes: A 4' x 10' durable rubber-backed DIES Winding Sidewalk Mat with carrying strap and user guide. (<i>Fatal Vision® Goggles not included</i>)</p>	\$399.00	
	<p><b>DIES® Roadside Sobriety Test and Stairs Challenge Mat</b> - The DIES Roadside Sobriety Test and Stairs Challenge Mat presents the challenge of performing a roadside sobriety test or walking down a set of stairs. Both of these tasks become significantly more difficult, as your audience members will experience when they try it themselves.</p> <p>Includes: A 4' x 10' durable rubber-backed DIES Roadside Sobriety Test and Stairs Challenge Mat with carrying strap and user guide. (<i>Fatal Vision® Goggles not included</i>)</p>	\$399.00

# SMASH MATCH® IMPAIRMENT CHALLENGE

 **ALCOHOL  
PREVENTION TOOLS**

This hands-on activity clearly demonstrates the impact of impairment on your judgment and reaction time

## EXPERIENCE

Alcohol impairs your ability to accomplish even the simplest of tasks – although it can be difficult to understand just how much it distorts your perception without seeing it firsthand. Smash Match® is an activity designed for use with Fatal Vision® Alcohol Goggles demonstrations that involves matching and placing simple traffic-related shapes on a mat, first without and then with the impairing effects of the Fatal Vision Goggles. Printed messages on the mat promote positive driving behaviors that may reduce the risk of traffic-related injuries and fatalities.

The Smash Match user guide helps the instructor lead participants in activities that will show them the dangers of driving impaired. Participants work with their instructor to develop strategies to prevent impaired driving and promote sober driving.

PRODUCT	PRICE
<b>Smash Match®</b> - Includes: Smash Match® Impairment Challenge Mat, shapes, digital timer, Smash Match carrying bag, and user guide. <i>(Fatal Vision® Goggles not included)</i> 	\$109.00
ADD-ONS	
<b>Fatal Vision® Alcohol Goggle</b> - Available in 5 BAC Levels	\$159.00 each

# SUM-IT-CUP® STANDARD DRINK UNIT

 **ALCOHOL  
PREVENTION TOOLS**

This simple yet engaging activity provides information that participants will remember and use to help them make informed choices about the consumption of alcohol

## EXPERIENCE

Not all drinks are created equal. Just because an alcoholic beverage is served in a single container doesn't mean that it's just "one drink." Specialty drinks that contain multiple shots of spirits or served in large glassware may have a more impairing affect. A person who only had "one drink" may overlook the amount of alcohol in that drink. That misunderstanding can lead to a higher blood alcohol concentration (BAC) than anticipated.

The SUM-IT-CUP® delivers a clear, interactive lesson about standard drink sizes for alcoholic beverages. Participants begin the lesson by serving themselves a simulated drink. This "drink" is poured into the SUM-IT-CUP measuring beaker to show how many servings of alcohol the person actually poured.

Turn learning into a game with Master Bartender®, a unique opportunity to educate about standard drink units (SDU) of common alcoholic beverages and promote responsible alcohol consumption.

PRODUCT	PRICE
<b>SUM-IT-CUP® Complete with Master Bartender®</b> - Includes: SUM-IT- CUP, rocks glass, wine goblet, beer mug, shot glass, pitcher, user guide, carrying case, acrylic ice cubes, glass strainer, and the Master Bartender Game 	\$280.00
<b>SUM-IT-CUP®</b> - Includes: Large volume measuring beaker, small volume measuring beaker and user guide	\$24.95
<b>Master Bartender®</b> - Includes: Directions and scoring sheets, 32 game play cards, 10 joke cards, 10 advice cards, 100 game coins for "tip money," SUM-IT-CUP large beaker, and SUM-IT-CUP small beaker. <i>For use with participants age 21 and over.</i>	\$39.99

# INTOXICLOCK® PRO REAL-TIME BAC ESTIMATOR

## ALCOHOL PREVENTION TOOLS

Visually illustrates how a person's weight, gender, drink of choice and drinking rate all matter in how long it takes an individual to metabolize alcohol to zero BAC

### EXPERIENCE

**Demonstrate the impact of alcohol consumption on blood alcohol concentration (BAC) virtually with intoxiclock® Pro software.** Intoxiclock Pro helps you to build a drinking scenario based on a person's gender, weight, drinking start time, the number and types of drinks consumed, and the time it takes to consume those drinks. Based on that input, intoxiclock Pro calculates and displays BAC and a real-time digital countdown of just how much time it takes to return to a BAC of 0.0. You can dynamically add drinks to an active drinking scenario and see the immediate effect on BAC and time to zero. The intoxiclock Pro Software comes standard with a digital user guide and instructional materials to guide program delivery and use. Pair the intoxiclock lesson with Fatal Vision® Alcohol Goggles to further your participant's experience.

Pair the intoxiclock software with your Fatal Vision® Alcohol Impairment Goggles to further your demonstration and lesson about alcohol impairment.

### BENEFITS

- ✓ **Flexible delivery** - virtually or in-person
- ✓ **Simple** to use
- ✓ **Easy** to understand
- ✓ **Provides relevant and meaningful lessons** about alcohol use, impairment and metabolism

# TURN 'N LEARN CLASSROOM CHALLENGE

# DISTRACT-A-MATCH® MULTITASK CHALLENGE

Alcohol  
Prevention Tools

Distracted Driving  
Prevention Tools

ALCOHOL AND  
DISTRACTED DRIVING  
PREVENTION TOOLS

Teach about the dangers of underage drinking, impaired driving, and drowsy and distracted driving

DISTRACTED DRIVING  
PREVENTION TOOLS

Distract-A-Match® and Fatal Reaction® are the ideal tools to help you deliver a simple and effective lesson about the dangers of distracted driving

## EXPERIENCE

Many students learn best when participating in engaging activities and games. Teach them about the dangers of underage drinking, impaired driving, and drowsy & distracted driving with the Turn 'N Learn Classroom Challenge.

Place participants into multiple teams, then take turns spinning the wheel to select a question category. Teams work together to answer questions and perform activities to earn points for their team.

Questions, role play, and activities with the Fatal Vision® Alcohol and Drowsy and Distracted Goggles help students identify strategies for making safe decisions, learn important facts, and dispel myths.

Turn 'N Learn can also be used to engage passersby in an exhibit or “walk-up” booth setting such as a safety fair, National Night Out, in a student commons area, or community festival.

PRODUCT	PRICE
<b>Turn 'N Learn Classroom Challenge -</b> Includes: 20.5" Game Wheel with Carrying Case, Game Wheel Inserts and Center Hub, Fatal Vision Alcohol Goggle: Silver Label Estimated BAC .17-.20+, Fatal Vision Drowsy and Distracted Goggle, Germicidal Wipes, Backpack, Game Play Cards: Alcohol and Distracted Driving, Game Play Activities: Play Coins, 2-Decks of Playing Cards, Building Blocks, 50-Disposable Plastic Cups, 2-Acrylic Pitchers, Digital Timer, and 3-Stress Balls	\$2,100.00

## EXPERIENCE

**Distract-A-Match® is a simple puzzle game that uses a timed multi-tasking activity to show how difficult it can be.** The lesson begins when the participant races against the clock to place shapes. The activity is repeated with a distraction, such as typing a text message on a cell phone or wearing the Fatal Reaction® audio distraction unit (not included). The activity ends when the participant compares their first and second attempts at the game. Typical results show that people will be slower and make more errors when distracted.

**The Fatal Reaction® audio distraction unit is a tool that simulates the effects of cognitive distraction.** Delayed audio feedback provides a slight echo effect that causes the participant to lose focus while speaking. This distraction takes away from the participant's ability to complete the game and perform the multi-task activity in a timely and efficient manner.

PRODUCT	PRICE
<b>Distract-A-Match® with Fatal Reaction® -</b> Includes: Distract-A-Match Game, Fatal Reaction audio distraction unit and remote, headset with microphone, user guide, and carrying case	\$855.00

# DANGER IN EVERY STEP® DISTRACTED DRIVING ACTIVITY MAT

# CHANGE BLINDNESS AND DISTRACTED DRIVING MEDIA PRESENTATION

## DISTRACTED DRIVING PREVENTION TOOLS

Add an additional dose of reality to your distracted driving awareness activities and outreach program

## DISTRACTED DRIVING PREVENTION TOOLS

Easy-to-use presentation is a must for any traffic safety program that addresses distracted driving

### EXPERIENCE

**Distracted driving can be just as dangerous as driving under the influence – but your participants will need to experience it to believe it.** The Danger in Every Step (DIES®) Distracted Driving Activity Mat is a durable mat with graphics depicting a rural town setting with streets, crosswalks, railroad crossings and other common town locations.

The challenge is to drive through town using a steering wheel to simulate a driving experience. Participants travel around the simulated town making stops at various locations while observing safe driving habits such as obeying traffic signs.

After participants complete their first trek through town they are asked to drive the route again - this time with distraction. Distractions such as texting while driving will typically cause the driver to miss turns, drive off the road, or miss stop signs. The experience demonstrates how distractions take away from a person's ability to safely operate a motor vehicle.

#### PRODUCT

**DIES® Distracted Driving Activity Mat** - Includes: A durable rubber-backed 4' x 14' DIES Distracted Driving Activity Mat with carrying strap, steering wheel, timer, "Pedestrian Pete," 16 stop signs, and a user guide

#### PRICE

\$725.00

### EXPERIENCE

**You're driving along a busy highway when you look down briefly to hit "send" on a text. As you raise your eyes again, you suddenly realize that traffic has stopped – but it's too late for you to slow down in time, and you crash into the car in front of you.**

This phenomenon is known as change blindness - when a driver does not notice a change in the driving environment has occurred.

The program places your participants in a series of five driving scenarios to illustrate how distraction and change blindness can inhibit their ability to continuously scan their environment, evaluate potential threats, and execute well-timed driving maneuvers to avoid a crash. During the presentation, the instructor will introduce the S.E.E. strategy (Search, Evaluate, and Execute), an approach to help reinforce safe driving skills and reduce the risk of distracted driving.

#### PRODUCT

**Change Blindness and Distracted Driving Interactive Media Presentation** - Includes: A downloadable MP4 video file (Target audience: Ages 14+ Time: 14:35 min.), PDF user guide, and worksheet

Drive home the dangers of alcohol and marijuana impaired driving along with drowsy and distracted driving

## EXPERIENCE

Think you can safely operate a vehicle after having a few drinks? Or, think sending that text message or driving after a poor night's sleep is no big deal? What about driving while under the influence of recreational marijuana?

The Fatal Vision® Roadster is exactly what you've been looking for to help you provide a program about the **dangers of alcohol and marijuana impaired driving along with drowsy and distracted driving.**

The Fatal Vision Roadster is an affordable vehicle that is easy to use and can be driven on all types of terrain, including off-road courses. Use it for demonstrations, classes, training courses or as part of a community event.

"Wearing Fatal Vision® Marijuana goggles and driving the course really gave me a better idea on how marijuana use can affect driving skills, reaction times and thought processes."  
- Evan, Student

## FEATURES AND BENEFITS

- ✓ Each Roadster comes standard with assembly instructions (light assembly required)
- ✓ One-year warranty on parts and frame against material defects in workmanship
- ✓ Multiple driving course layouts and is ideal for both small or large groups

**Upgrade packages start at \$3,740.00**  
**Call 800-272-5023 for a Quote today!**

Control SIDNE® from a distance of 75' with the infrared transmitter!

A safe and effective experience demonstrating a driver's susceptibility to the effects of impairment and distraction while driving

## EXPERIENCE

If you're looking for the preeminent impaired driving simulator, **SIDNE® (Simulated Impaired Driving Experience)** is just the ticket. SIDNE is a custom-built electric kart that allows drivers and passengers to experience what can happen when they operate a vehicle under the **influence alcohol** or **marijuana** as well as the ramifications of **driving while drowsy or distracted**.

When driving SIDNE, electronics in the vehicle allow participants to experience loss of control, impaired judgment, erratic acceleration and braking, delayed response, missed turns, and lane shifts into "oncoming traffic." These effects mimic impairments that are common with motorists under the **influence of alcohol**.

SIDNE also has specially designed add-on courses that provide the ability to simulate driving while under the **influence of marijuana or being drowsy or distracted**.

## FEATURES AND BENEFITS

- ✓ You can run SIDNE indoors or outdoors
- ✓ The pedals and steering wheel can be adjusted to accommodate the height of the participant
- ✓ SIDNE runs at 4 or 8 miles per hour and the instructor can control the vehicle's speed and mode with a remote switch from up to 75 feet
- ✓ SIDNE also includes a remote braking feature to stop a moving vehicle immediately
- ✓ Each SIDNE comes standard with Innocorp's product training session to teach your staff the safe and appropriate use of the vehicle

# TACTICAL FUNCTIONAL TRAINING® – MOBILITY AND WELLNESS PROGRAM

# PLAN MY RIDE® – WEB-BASED TRAINING PROGRAM

NEW

NEW

## VIRTUAL LEARNING

Identifies exposure points that are especially susceptible to injury and targets them through a multi-level mobility and fitness building process

## VIRTUAL LEARNING

Flexible delivery – can be completely remote or use a blended learning approach with instructor-led discussion and activity guides

## EXPERIENCE

**TFT (Tactical Functional Training Program) is a remote learning mobility and wellness support system designed for police officers to help them with their health and well-being throughout their careers.** Learn how to reduce the common injuries seen in shoulders, low back, hips, and ankles by doing the TFT movements designed to increase mobility.

- ✓ **Aims to reduce job-related injuries** and provide departments a reduction in lost time and insurance claims.
- ✓ Get **expert nutritional advice, targeted mobility movements,** and fitness insights from veteran law enforcement officers.
- ✓ Delivers content in short video vignettes that will guide you through **exercises specifically designed to address the law enforcement job's idiosyncrasies** that can lead to injury. Heavy-duty belts, Kevlar vests, stress, and many other factors all contribute to exposure on the job.
- ✓ Gives officers **control over their fitness and nutrition regime** through the TFT mobile application. TFT aims to help officers become their best physical selves and be more productive in their professional and personal lives.

## EXPERIENCE

**Plan My Ride is a research-based, self-paced, interactive, virtual traffic safety program developed with and for young drivers.** Topics included in this web-based education program include: driving skills, distracted driving, substance impaired driving, and skills to avoid impaired driving or riding with an impaired driver.

- Distinctive features of Plan My Ride:**
- ✓ Scientifically rooted in behavior change theory
  - ✓ Focused on teaching not only about the problem of impaired driving but also tangible skills to prevent it in everyday life
  - ✓ Designed in look, feel, tone, and content to be relatable and engaging to young drivers
  - ✓ An interactive and self-paced online learning program that can be delivered remotely
  - ✓ Shown to change knowledge, attitudes and beliefs about impaired driving, perceived norms, self-efficacy to avoid impaired driving, and behavioral intentions to avoid impaired driving

# BANNERS AND POSTERS

## ALCOHOL IMPAIRMENT

### Alcohol "You Call the Shots"

See how much alcohol is in the drinks you are consuming with "You Call The Shots." These banners and posters include a calorie count for 52 popular drinks and highlight how much alcohol is typically contained in each serving. This information will help people understand the amount of alcohol they are really consuming in any particular drink.

## DROWSY AND DISTRACTED DRIVING

### "How Focused Are You?"

"Drivers talking on phones, handheld or hands-free, MISS SEEING UP TO 50% OF WHAT IS AROUND THEM, including other drivers, pedestrians and bicyclists." Increase awareness and educate others with these eye-opening statistics about drowsy and distracted driving.

## MARIJUANA IMPAIRMENT

### Marijuana "Up In Smoke"

Designed to get people thinking about the effects of Recreational Marijuana. These eye-catching banners and posters provide statistics about the potential consequences that recreational marijuana has on driving, education and addiction.

PRODUCT TRAINING

"The training session gave our staff the confidence and capacity to engage our community with Fatal Vision® prevention tools."  
- Octavia Marsh, Executive Director, Hanover Cares Coalition

PRODUCT TRAINING

Maximize the impact of your Fatal Vision® program with an innocorp training session

CONTACT US TO DISCUSS  
VIRTUAL TRAINING OPTIONS

EXPERIENCE

Innocorp's certified trainers work with your instructors, outreach staff, and prevention specialists teaching them how to use Innocorp products and incorporate them into your awareness and prevention programs.

A training session will help you fine-tune your prevention lesson and prepare your staff to deliver a successful program. Training is ideal for new instructors or those who need a refresher to improve their program delivery techniques and methods for effectively using Innocorp products. The content and length of the class can be customized to meet your organization's training needs and goals.

Training Objectives

- ✓ Learn and apply safe demonstration techniques using Innocorp products to engage your audience.
- ✓ Identify how to integrate Innocorp products into your existing program for maximum impact.
- ✓ Improve your instructor's program delivery through role-play and activity demonstrations.
- ✓ Build your team's confidence and capacity while learning through dialogue and experience.
