NEW FOR 2025

HIGHLIGHT THE DANGERS OF VAPING

WITH INTERACTIVE ACTIVITIES FROM INNOCORP, LTD

DID YOU KNOW?

Over 2.5 million middle and high school students reported using e-cigarettes in 2023. [cdc.gov](https://www.cdc.gov)

Use the Vaping Dangers Kit to engage students in interactive activities that help them understand the risks of lung damage, addiction, and other health concerns associated with vaping—equipping them to make informed, healthy choices. » See Page 2 for kit details.

NEW VAPING EDUCATION

VAPING
EDUCATION

Empower your community with educational activities, banners, and posters highlighting the health risks of vaping.

EDUCATE ON THE DANGERS OF VAPING

Engage your audience with hands-on tools that reveal the real risks of vaping.

The Vaping Dangers Education Kits use engaging, interactive activities to raise awareness about the health consequences of vaping—such as reduced lung capacity, addiction, and the impact on decision-making. These tools are designed to help participants visualize risk, practice refusal strategies, and experience how addiction can interfere with daily life.

With activities that simulate impaired lung function, encourage healthy decision-making, and model the frustrations of addiction, these kits offer a powerful way to connect with youth in schools, community programs, and outreach events.

Both the Program and Event Kits are simple to use, easy to understand, and adaptable for small groups or large audiences. They support prevention education and promote healthier choices through memorable, activity-based learning.

PRODUCT	NEW EVENT KIT \$750.00 [4 ACTIVITIES]	NEW PROGRAM KIT \$399.00 [2 ACTIVITIES]

EXPERIENCE

Elevate alcohol impairment education with **DIES® Mats**—hands-on, scenario-based tools that spark conversation and build awareness. Whether navigating a winding sidewalk, a crowded party, or a simulated driving task, each mat delivers an engaging, real-world learning experience.

Paired with Fatal Vision® Goggles, **DIES Mats** highlight the dangers of alcohol impairment in a memorable and impactful way.

Why **DIES Mats**?

- ✓ Simulate real-life situations involving alcohol impairment
- ✓ Reinforce safety messages through interactive learning
- ✓ Spark reflection, feedback, and meaningful discussion
- ✓ Equip instructors with ready-to-go materials, including guided best practices, talking points, and optional activity enhancements

PRODUCT	PRICE
 <p>NEW – DIES® Alcohol Driving Mat with the RTFS Wheel and Sensor Mat Enhance the experience with real-time feedback. The RTFS interactive wheel and sensor mat provide instant sound and vibration cues, deepening the impact and sparking conversation. Includes: 1 RTFS interactive wheel and 1 guide mat with sensors.</p> <p>NEW – DIES® Alcohol Driving Mat – Experience alcohol impairment from the driver's seat. This activity simulates impaired driving using a steering wheel and visual cues—challenging participants to stay on course while wearing Fatal Vision® Goggles. Unlike walking-based mats, this setup mimics real driving behavior and decision-making under the influence. Includes: A 4' x 14' durable rubber-backed DIES Alcohol Driving Mat with carrying strap and standard steering wheel. (<i>Fatal Vision® Goggles not included</i>)</p>	<p>\$2,475.00</p> <p>\$1,150.00</p>
 <p>NEW LOOK – DIES® Balcony Danger Mat – Designed to raise awareness about the dangers of alcohol impairment in a party scene. This mat provides the simulated challenge of walking through a room while performing simple tasks such as picking up a keys or a cell phone, talking to another party goer, and avoiding tripping hazards that could result in falling from the balcony to the street below. This activity is ideal for those addressing potential dangers associated with house parties and other instances where alcohol may be present. Includes: A 4' x 14' durable rubber-backed DIES Balcony Danger Mat with carrying strap and user guide. (<i>Fatal Vision® Goggles not included</i>)</p>	<p>\$875.00</p>
 <p>DIES® Winding Sidewalk Mat – The DIES Winding Sidewalk Mat simulates the dangers associated with alcohol impairment while strolling along a winding sidewalk. This activity demonstrates to your audience the potential dangers of walking home impaired, which include falling off a sidewalk into traffic. Includes: A 4' x 10' durable rubber-backed DIES Winding Sidewalk Mat with carrying strap and user guide. (<i>Fatal Vision® Goggles not included</i>)</p>	<p>\$875.00</p>
 <p>NEW LOOK – DIES® Roadside Sobriety Test and Stairs Challenge Mat – The DIES Roadside Sobriety Test and Stairs Challenge Mat presents the challenge of performing a roadside sobriety test or walking down a set of stairs. Both of these tasks become significantly more difficult, as your audience members will experience when they try it themselves. Includes: A 4' x 14' durable rubber-backed DIES Roadside Sobriety Test and Stairs Challenge Mat with carrying strap and user guide. (<i>Fatal Vision® Goggles not included</i>)</p>	<p>\$875.00</p>

FATAL VISION® ALCOHOL GOGGLES

MODELED IMPAIRMENTS

Impaired balance, vision, reaction time, and judgment

EXPERIENCE THE IMPACT

Discover the realistic effects of alcohol impairment with Fatal Vision® Alcohol Goggles. This eye-opening tool allows individuals to experience the potential consequences of everyday tasks while under the influence. Walking a line, balancing on one leg, grabbing keys, and throwing a ball become challenging as the goggles simulate impaired vision, balance, reaction time, and judgment caused by alcohol.

An excellent fit with intoxiciclock® kits, featuring real-time B.A.C. calculations and customizable scenarios. » Page 20

HOW IT WORKS

Fatal Vision Alcohol Goggles enables you to provide powerful lessons on impaired driving, underage drinking, and alcohol abuse. Participants engage in simple activities or sobriety tests without and then with goggles, enabling them to compare their performance while sober and impaired. The goggles replicate the impairments associated with different Blood Alcohol Concentrations (BAC), ranging from under .06 to .25+ BAC. Choose between clear lenses for daytime simulation or shaded lenses for nighttime simulation.

Discover the impact of alcohol impairment firsthand with Fatal Vision Alcohol Simulation Goggles.

FATAL VISION® CONCUSSION GOGGLES

MODELED IMPAIRMENTS

Visual disconnect, hesitation, disorientation, dizziness, and confusion

EXPERIENCE THE REALITY

Step into the shoes of someone with a traumatic brain injury (TBI) using the Fatal Vision® Concussion Simulation Goggles. This program allows participants to understand the effects of a concussion caused by head or body impact. By experiencing these effects firsthand, participants are empowered to recognize and report concussions, take preventive measures, and adhere to prescribed recovery protocols.

HOW IT WORKS

These comprehensive kits include activities carefully crafted in collaboration with trauma doctors to simulate hand-eye coordination, visual acuity, balance, and cognitive abilities. Participants first complete the activities in their normal state and then put on the Fatal Vision® Concussion Simulation Goggles. As they wear the goggles, they experience simulated TBI symptoms such as dizziness, visual impairment, disorientation, and confusion.

Gain a deeper understanding of traumatic brain injuries with the Fatal Vision Concussion Simulation Goggles.

"I could not do this presentation without the Fatal Vision® Concussion Goggles. There's no other way to simulate these situations." - Kassie Campbell, RN, BSN – University of Missouri Health Care's University Hospital

PROGRAM KIT [5 ACTIVITIES]

FATAL VISION® DROWSY AND DISTRACTED GOGGLES

MODELED IMPAIRMENTS

Slower reaction times, lapses in judgment, delay in processing, and divided attention failure

EXPERIENCE THE RISKS

Do not underestimate the dangers of drowsy and distracted driving.

Fatal Vision® Drowsy and Distracted Goggles offer a unique opportunity to understand the impairments caused by these behaviors and the potentially life-altering consequences they can lead to.

**UNDERSTAND THE RISKS.
ENCOURAGE SAFER DRIVING.**
These hands-on activities spark eye-opening conversations about the dangers of drowsy and distracted driving, and motivate safer choices behind the wheel.

HOW IT WORKS

Controlled through a Bluetooth-enabled mobile app, the Fatal Vision® Drowsy and Distracted Goggles offer three impairment modes:

Mode A – Distracted Dial: Simulates the consequences of briefly looking away to dial a phone. The goggles blackout every 3 seconds, highlighting the dangers of divided attention.

Mode B – Distracted Text: Replicates the distraction caused by reading or responding to a text. Goggles blackout for 4.6 seconds, reflecting the average time people engage in a text message instead of focusing on the road.

Mode C – Drowsy: Simulates the additional effect of momentary micro-sleeps that eventually lead to complete shutdown. The goggles progressively blackout, starting with short half-second closures and escalating to a 10-second blackout.

Experience the reality of drowsy and distracted driving with the Fatal Vision Drowsy and Distracted Goggles.

KIT OPTIONS

DROWSY AND DISTRACTED GOGGLES

NEW LOOK

NEW FATAL VISION® OPIOID GOGGLES

PATENT NO.: US 11,678,841 B1

MODELED IMPAIRMENTS

Divided attention failure, nodding out, contrast sensitivity impairment, heaviness and lethargy

EXPERIENCE THE EFFECTS

Introducing the Fatal Vision® Opioid Goggles and associated activities to raise awareness about the dangers of opioid use and abuse. These goggles simulate the opioid impairments of divided attention failure, nodding out, contrast sensitivity impairment, heaviness, and lethargy.

The Fatal Vision® Opioid Goggles can be controlled and configured from a mobile app on your phone.

HOW IT WORKS

Control the Fatal Vision® Opioid Goggles through Bluetooth using the opioid mobile app on your smartphone. Choose from three impairment modes:

Mode A – Divided Attention Failure:

Replicates difficulty focusing and initiating tasks. The goggles sequentially blackout quadrants, impairing sustained attention.

Mode B – Nodding Out: Simulates the gradual shutdown of consciousness, resulting in unresponsiveness—portions of the lens's blackout, mirroring the closing of the eyes.

Mode C – Progressive Sequence:

Demonstrates the progression from lower to higher doses of opioids, cycling through both Mode A and Mode B.

To truly comprehend the complexity of opioid impairment, we've incorporated additional impairments:

Contrast Sensitivity

Impairment: a special film on the goggles reduces the wearer's ability to distinguish an object from its background at the periphery.

Heaviness and Lethargy:

use of wrist weights cause a lack of coordination and sluggishness when performing the associated activities.

"This (Fatal Vision® Opioid Program Kit) is an amazing tool that addresses an issue everyone in the prevention field has been trying to provide information about. Our Youth Council gives them their seal of approval!" - Mary Ball, Project Coordinator – Advocates for Substance Abuse Prevention Coalition

FATAL VISION® POLYDRUG [ALCOHOL & THC] GOGGLES

MODELED IMPAIRMENTS

Distorted perception, poor motor coordination, slowed decision-making, and delayed reactions

EXPERIENCE THE AMPLIFIED IMPAIRMENTS

Fatal Vision® Polydrug [Alcohol & THC] Goggles replicate the amplified impairments that arise from consuming multiple drugs simultaneously.

When alcohol and tetrahydrocannabinol (THC) are used together, impairments are enhanced beyond the effects of either drug alone. Users will find that their coordination is compromised, cognitive processing is distorted, and driving skills are negatively affected to an amplified degree.

HOW IT WORKS

The Fatal Vision Polydrug [Alcohol & THC] Goggles and activities simulate impairments such as distorted perception, poor motor coordination, slowed decision-making, and delayed reactions. They demonstrate cognitive distortion and balance challenges experienced when impaired. The Polydrug lens filters visual cues and information to illustrate impaired cognitive perception and the potential consequences. The goggles also impact targeting, decision-making speed, reaction time, and motor skills—highlighting the amplified impairments and risks associated with polydrug use.

BENEFITS

- ✓ Safely address the growing concern of polydrug impaired driving
- ✓ Multiple activities demonstrate the amplified impairments and their negative impact on communities, homes, schools, and workplaces
- ✓ Engaging instructional materials facilitate effective demonstrations
- ✓ Understand and display the amplified impairments resulting from combined alcohol and THC use
- ✓ Developed in collaboration with Drug Recognition Experts to ensure a realistic simulation of impairments

NEW LOOK

FATAL VISION® THC GOGGLES

PATENT NO.: US 10,366,630 B2

NEW ACTIVITY

NEW LOOK

MODELED IMPAIRMENTS

Loss of short-term memory, executive function, altered visual perception, and slight loss of motor coordination

EXPERIENCE THE DIFFERENCE

Fatal Vision® THC Goggle offers a unique perspective on the effects of tetrahydrocannabinol (THC) impairment. Unlike the Alcohol Goggle, the THC Goggle simulates impairments specific to THC use—such as distorted visual perception and delayed reaction time—highlighting how THC affects the brain differently.

HOW IT WORKS

The Fatal Vision THC Goggle, used with specially designed activities, reduces a person's ability to accurately perceive and respond to visual information. The THC lens filters cues and information to illustrate impaired cognitive perception and its potential consequences, offering a compelling look into how THC affects focus, timing, and spatial judgment.

Each kit includes instructional materials and custom activities that effectively demonstrate the risks associated with THC use, helping participants gain a clearer understanding of the dangers of impairment.

*Goggles are only effective with the activities in the kit.
Therefore, they are not sold separately.*

PROGRAM KIT
[5 ACTIVITIES]

SMASH MATCH® IMPAIRMENT CHALLENGE

ALCOHOL PREVENTION TOOLS

This hands-on activity clearly demonstrates the impact of impairment on your judgment and reaction time

EXPERIENCE THE IMPAIRING EFFECTS OF ALCOHOL

Alcohol distorts your perception, making even simple tasks challenging. Smash Match® is an engaging activity designed for use with Fatal Vision® Alcohol Goggles demonstrations. Participants match and place traffic-related shapes on a mat, experiencing the impairing effects of the goggles firsthand. The mat features printed messages promoting positive driving behaviors to reduce the risk of traffic-related crashes.

The user guide provided with Smash Match assists instructors in leading participants through activities that highlight the dangers of impaired driving. Together, participants and instructors develop strategies to prevent impaired driving and promote sober driving.

SUM-IT-CUP® STANDARD DRINK UNIT

Alcohol
Prevention Tools

ALCOHOL PREVENTION TOOLS

This simple yet engaging activity provides information about the impact of alcohol

EXPERIENCE THE REALITY OF STANDARD DRINKS

Not all drinks are equal when it comes to alcohol content. The SUM-IT-CUP® provides an interactive lesson on standard drink sizes for alcoholic beverages. Participants serve themselves a simulated drink, which is then poured into the SUM-IT-CUP measuring beaker. This activity visually demonstrates the actual number of servings of alcohol in the drink, helping participants understand the potential impact on their blood alcohol concentration (BAC).

MASTER BARTENDER® turns learning into a fun game, offering a unique opportunity to educate about standard drink units (SDU) of common alcoholic beverages. It promotes responsible alcohol consumption by increasing awareness of drink sizes and their alcohol content.

PRODUCT	PRICE
SUM-IT-CUP® Complete with Master Bartender® – Includes: SUM-IT- CUP, rocks glass, wine goblet, beer mug, shot glass, pitcher, user guide, carrying case, acrylic ice cubes, glass strainer, and the Master Bartender Game	\$375.00

Master Bartender® – Includes: Directions and scoring sheets, 32 game play cards, 10 joke cards, 10 advice cards, 100 game coins for “tip money,” SUM-IT-CUP large beaker, and SUM-IT-CUP small beaker. <i>For use with participants age 21 and over.</i>	\$60.00

INTOXICLOCK® PRO REAL-TIME BAC ESTIMATOR

ALCOHOL PREVENTION TOOLS

Illustrate how a person's weight, gender, drink of choice and rate of consumption all matter in how long it takes an individual to metabolize alcohol to zero BAC

EXPERIENCE

Experience the impact of alcohol consumption on blood alcohol concentration (BAC) with intoxiclock® Pro software.

Easily build customized drinking scenarios based on gender, weight, drink types, and consumption time. Watch as the software calculates and displays BAC in real-time, along with a countdown to zero BAC. Add drinks dynamically to see immediate effects. The software includes user-friendly guides and instructional materials for seamless program delivery.

Enhance the experience by pairing with Fatal Vision® Alcohol Goggles.

BENEFITS

- ✓ Flexible delivery options: in-person or virtually using video conferencing platforms such as, Zoom, Microsoft Teams, or other meeting platforms
- ✓ User-friendly and easy to use
- ✓ Clear and understandable results
- ✓ Provides valuable lessons on alcohol use, impairment, and alcohol metabolism

Distracted Driving
Prevention Tools

DISTRACTED DRIVING PREVENTION TOOLS

Distract-A-Match® is the ideal tool to help you deliver a simple and effective lesson about the dangers of distracted driving

EXPERIENCE

Distract-A-Match® is a timed multi-tasking puzzle game that demonstrates the challenges of staying focused. Participants race against the clock to place shapes, and then repeat the activity with a distraction, like typing a text message. A comparison of the first and second attempts reveals slower performance and more errors when distracted. It's an eye-opening experience highlighting the impact of distractions on productivity.

PRODUCT

Distract-A-Match® Game – Includes: Game mat, assorted shapes, digital timer, carrying bag, and user guide. (*Fatal Vision® Goggles not included*)

PRICE

\$199.00

ADD-ONS

Replacement Shapes for Distract-A-Match® – Includes: 64 assorted shapes only

\$90.00

DANGER IN EVERY STEP® DISTRACTED DRIVING ACTIVITY MAT

DISTRACTED DRIVING PREVENTION TOOLS

Add an additional dose of reality to your distracted driving awareness programs

EXPERIENCE

Distracted driving is just as dangerous as driving under the influence, but your participants need to experience it firsthand to truly understand. The DIES® Distracted Driving Activity Mat is a durable mat that portrays a realistic town setting with streets, parks, businesses, and other common locations. Participants use a steering wheel to navigate through the simulated town, making stops and observing safe driving habits.

After completing the first drive, participants take on the challenge again, this time with distractions like texting while driving. The effects are evident as participants miss turns, veer off the road, or ignore stop signs. This eye-opening experience vividly demonstrates how distractions impair a person's ability to safely operate a vehicle.

See page 10 for the Fatal Vision® Drowsy and Distracted Kits and their engaging activities to enhance your program.

FATAL VISION® ROADSTER PEDAL KART

NEW

THC Driving Course –
Redesigned for Greater Impact

DRIVING SIMULATIONS

Get real about the dangers of alcohol and THC
impairment along with drowsy and distracted driving

EXPERIENCE

Do you believe you can safely drive after a few drinks? Or that texting while driving or getting behind the wheel after a sleepless night is no big deal? What about driving under the influence of THC? The Fatal Vision® Roadster is here to provide a hands-on experience that will change your audience's perspective on impaired driving.

FEATURES

- ✓ **Easy Assembly** – Each Roadster comes standard with assembly instructions (assembly required)
- ✓ **Reliable Warranty** – One-year warranty on parts and frame against material defects in workmanship
- ✓ **Versatile Driving Courses** – Accommodates small and large groups with multiple layouts for an engaging experience.
- ✓ **Comprehensive Guide** – Instructional materials prepare instructors for engaging and relevant demonstrations.

Promote safe choices on the road by using this powerful tool to address impaired, drowsy, and distracted driving risks in your traffic safety program.

BEST SELLER

"Wearing the THC goggles and driving the course really gave me a better idea on how cannabis use can affect driving skills, reaction times and thought processes." – Evan, Student

SIDNE® – SIMULATED IMPAIRED DRIVING EXPERIENCE VEHICLE

NEW LOOK

Control SIDNE® from a distance of 75' with the infrared transmitter!

A safe and effective experience demonstrating a driver's susceptibility to the effects of impairment and distraction while driving

EXPERIENCE

Looking for the ultimate impaired driving simulator? Look no further than SIDNE® (Simulated Impaired Driving Experience)—a custom-built electric kart that delivers a firsthand look at the dangers of driving under the influence of alcohol, THC, or while drowsy or distracted.

Participants experience impaired judgment, delayed response time, loss of control, erratic braking, and lane drifting—realistic behaviors modeled after intoxicated or impaired drivers. SIDNE also includes optional courses to simulate THC impairment and distracted or drowsy driving.

FEATURES

- ✓ **Versatile Use** – For indoor or outdoor training.
- ✓ **Adjustable Controls** – Accommodates various participant heights.
- ✓ **Remote Operation** – Instructor-controlled speed, mode, and braking (up to 75 ft).
- ✓ **Comprehensive Training** – Hands-on training ensures safe, effective use.

NEW 8.0 ENHANCEMENTS

- ✓ **Raised Seat** – Easier entry/exit, improved accessibility.
- ✓ **Durable Steering Motor/Tie Rod Protection** – Shields key components for long-lasting performance.
- ✓ **Enhanced Steering** – Clear left/right limits for realistic control.
- ✓ **Improved Parking Brake** – Easier release for smoother stops.
- ✓ **Stronger Bumper** – Flexible design for better impact protection.
- ✓ **Improved Pedal Placement** – Increased comfort and control.
